### INTERNAL LEAKAGE ( TYPICAL )

Do not operate pump more than 5 seconds at any speed or viscosity if internal leakage is more than 50% of theoretical flow.  
Total leakage is the sum of each section loss at its operating conditions.

### NOISE LEVEL ( TYPICAL ) VT67BB- B10-B03

Double pump noise level is given with each section discharging at the pressure noted on the curve.

### HYDROMECHANICAL POWER LOSS ( TYPICAL )

Total hydromechanical power loss is the sum of each section at its operating conditions.

### PERMISSIBLE RADIAL LOAD

Maximum permissible axial load  $F_a = 800\text{N}$  (180 lbs)
